

TRANSCORE®
3sixty™

Compliance Services

Fuel and Mileage Tax Services. Eliminate costly paper tracking with our streamlined fuel and mileage tax service. Reduce use of trip sheets, fuel receipts, and toll receipts and save critical time by ensuring that you are in compliance across all states and provinces.

Vehicle Compliance Services

- Full-service fuel and mileage tax preparation and filing
- Monthly and quarterly management reports
- Personalized data analysis
- Turnkey audit support

Already collect your fuel tax data electronically? Whether you use TransCore's GPS-based Datatracker system or another GPS system, we will integrate your data with our system to generate accurate electronic fuel tax reports. Or, we'll process your paper trip sheets in our computerized system and produce the same high quality results.

Know who you are dealing with.

Insurance and Operating Authority Verification.

Obtaining accurate insurance and operating authority information on your counter parties is essential to your business. The industry practice of faxing or receiving several pages of detail concerning each company you contemplate doing business with is time-consuming and expensive. 3sixty Compliance Services takes the hassle and worry out of this tedious chore by providing you with all the information you need; all of which is verified by TransCore Link Logistics®.

We give you access to key information concerning counterparties such as:

- Motor Carrier (MC)
- U.S. DOT
- Ontario CVOR

- Hazardous Materials Certificate
- Operating Authorities
- Insurance Data
- And More

Insurance information is monitored regularly to ensure that policies remain in effect. Having all this vital information at your fingertips ensures that you have all the information you need to make professional, informed business decisions and relieve your staff of this tedious and time-consuming task.

Less worry. More profit.

There are certain things you wish you didn't have to worry about. With 3sixty Compliance Services from TransCore, you'll have a few

less things to keep you awake at night. Let us remove the headache and expense involved in managing the increasingly complex and time-consuming world of compliance, including insurance and authority verification and fuel tax reporting.

We offer a full suite of tools to help you stay current on the latest U.S. Customs and Border Protection Regulations, including the Automated Commercial Environment (ACE).

Our full range of web-based services keep your fleet running and legal, while impacting your bottom line. With automated calculation and reporting functions, you can focus on your business while our Compliance Services maximize your profitability.

The Automated Commercial Environment (ACE) for highway carriers is quickly approaching and will change the way highway shipments are processed and handled by U.S. Customs and Border Protection (CBP). The ACE project is part of a modernization plan which requires electronic manifest submissions from highway carriers to US Customs 1 hour before the truck reaches the U.S. border or 30 minutes prior for FAST carriers.

The Automated Commercial Environment (ACE)

ACE speeds the flow of legitimate trade and cargo entry processing and provides carrier participants with electronic authorization to move cargo through the US border. Carrier manifest information will also flow to the customs broker directly from U.S. customs in the form of a broker download which is made possible by including the U.S. customs broker's filer number in the carrier's transmission. The result? Your shipments move faster.

The ACE system empowers the carrier to take their destiny into their own hands by making sure prior notice is given to U.S. Customs before reaching the border. This eliminates the possibility of receiving fines, which have been steep with first offences for "no prior notice of cargo details" reaching \$5,000.00.
