

TRANSCORE[®]
3Sixty[™]
Fleet Management

You get all the communications

Knowledge is Power. It's one thing to know where your trucks are, but knowing *how* they are significantly improves your fleet management capabilities.

With TransCore's 3sixty™ Fleet Management powered by GlobalWave®, you get all the communications, tracking, and diagnostics tools you need at your fingertips, all at an affordable price. From state-of-the-art satellite communications to RFID-based systems for freight terminal gate access control, you will gain valuable insight into equipment location and status.

and diagnostics tools you need at your fingertips.

3sixty Fleet Management's all-satellite system improves dispatcher efficiency, maximizes driver performance and safety, secures assets, increases revenue per vehicle, and can lead to reduced insurance costs.

- 100 percent satellite coverage for location tracking and equipment monitoring
- Constant real-time access to asset management information
- Environmentally sealed and durable mobile terminals operate for years with little or no maintenance
- Easy-to-use Web interface management information

Eliminate **worry** for one monthly rate.

Easily track and monitor virtually anything that moves and locate your assets within 30 feet. Accurate fleet tracking and monitoring provides results you can measure – all for one low monthly rate that is about the price of cellular service.

In-Cab Messaging. Real-time, two-way satellite communications keep you connected with your drivers, helping you improve customer service, fleet utilization and driver security.

Real-time, two-way communications keep you connected with your drivers.

Additionally, you can use these tools to increase operational efficiency up to 40 percent and increase driver retention by eliminating stressful communications with cell phones. Easy-to-use features make it simple for drivers and dispatchers to communicate:

- Flexible prescheduled GPS reports
- Real-time GPS updates
- Straightforward, easy-to-use driver keypad
- Preprogrammed response messages
- Detailed order-form messages
- Driving directions
- Geofencing
- Simple, Web-based interface
- Text messages that put reports in writing, limiting communication errors
- Key metrics include delivery status, event notifications and dispatch forms
- Customer log-in allows your shipper customers to get real-time location data

With In-cab Messaging from 3sixty Fleet Management, you'll improve visibility for your customers by providing real-time driver location and status updates.

Fleet Performance. Maximize your fleet performance and keep your drivers safe with the 3sixty Fleet Management suite of products. With direct access to your truck's engine computer, transmitted via GPS technology, you can continually monitor key performance indicators such as oil pressure and temperature, coolant level and temperature, and intake manifold temperature. Monitor engine performance standards and be immediately notified of any irregularities.

Managing your fleet performance has never been easier. 3sixty Fleet Management creates GPS-based performance reports detailing the following fleet management criteria:

- Idle times
- RPMs
- Odometer readings
- Speed

Fuel Tax Reporting. Boost fleet management effectiveness with automated fuel tax reporting. 3sixty Fleet Management automatically generates time-stamped messages that record a vehicle's odometer reading every time a state or province line is crossed. Integrated and automated fuel tax reporting eliminates costly reporting errors and saves you time and money by significantly streamlining your asset management process.

Trailer Tracking & Monitoring. Our satellite-based technology translates into tightened security, improved asset control, and increased productivity and profitability.

Know the exact location and status of every trailer in your fleet, helping you:

- Prevent cargo theft
- Reduce detention time
- Expedite recovery of stolen equipment
- Reduce insurance costs
- Improve your trailer-to-tractor ratio by 5 to 10 percent
- Increase dispatcher efficiency by up to 25 percent
- Establish geofencing parameters

3sixty Fleet Management provides a variety of sensors to monitor high-value cargo and temperature-sensitive loads, as well as receive empty notifications.

- Cargo sensor
- Temperature sensor
- Door sensor
- Tire pressure sensor

Installation of the mobile terminal and sensor can take less than 15 minutes and can be performed on loaded trailers and cargo, thereby saving maintenance time and effort. The terminal has an extended battery life of up to five years, so you don't have to worry about constant maintenance. With our easy-to-use Web interface and customer log-in, you and your customers have 24/7 access to the whereabouts and condition of cargo.

Truck Tracking. Protect your investment in your assets and safeguard your customers' cargo with truck tracking from 3sixty Fleet Management. A simple and secure Web-based interface can be viewed anywhere in the world, giving you on-demand access to track and monitor, within 30 feet, virtually anything that moves. Easily access important data such as asset speed, direction, and location.

Freight Terminal Gate Access Control

With our RFID tag and reader solutions, you can automatically and continuously monitor terminal gate readers, capture data, validate tags, open gates, and update equipment activity databases. Whether you have one terminal location or hundreds nationwide, our RFID-based terminal management and gate monitoring solution provides increased productivity and reduced costs:

- Automatic, hands-free data collection of equipment entry and departure
- Real-time equipment availability and shipment arrival information
- Reduced dwell time due to faster vehicle entry/exit
- Authorization for fueling, washing, and maintenance
- Increased security through gate access control

Heavy Equipment Management. Don't leave the maintenance of your substantial equipment investment to chance. Monitor and manage the vital signs of all your heavy equipment with our cost-effective asset management and monitoring tools.

Our fully redundant satellite network provides you with constant supervision of your assets, enabling you to protect against equipment failure and theft, reducing repair and insurance costs. With access to many engine diagnostic and operational reports, you have the power to control your valuable assets at every level.

The Information You Need Is Only a Click Away. Only 3sixty Fleet Management brings together all-satellite technology with an easy-to-use communications interface, as well as RFID-based solutions. Call TransCore today and let us show you the best 3sixty Fleet Management package for your business.
