

3sixty™
connected

Platform Overview

Imagine being connected – connected to your business in a way that gives unparalleled insight into the mission critical components of your transportation enterprise. Enabling you to run your business rather than letting your business run you.

Introducing 3sixty from TransCore.

The 3sixty suite of products and services provides the essential tools -

The six core segments of 3sixty cover the essential aspects of managing both large and small transportation companies.

when, where and how you need them to gain a complete view of your transportation enterprise. 3sixty is built around a core premise - provide our customers with a flexible suite of products that delivers the information and services needed to make their transportation enterprise as efficient and profitable as possible.

Each segment works independently or in conjunction with the others - giving you the ability to assemble the optimal solution for your business. So tap into the full power of 3sixty and gain a whole new perspective on you business.

Freight Match

Now you can use the world's largest, most powerful load and truck search engine to find exactly what you need, when you need it, for one flat rate. Powered by Loadlink, 3sixty Freight Match is designed around the way you work so it's easy to use. And only 3sixty Freight Match brings together the most powerful freight-matching engine and the industry's most advanced tool set - all with unlimited access.

Fleet Management

When it comes to managing your fleet, ignorance is NOT bliss. It's one thing to know where your trucks are but knowing how they are significantly improves your fleet management capabilities. We offer trailer tracking and in-cab communications and diagnostics reporting through our all-satellite, 100% coverage, network - giving you access to mission critical information about your drivers and your equipment - saving time, money and increasing productivity.

Operations Management

The transportation business is complicated, but your dispatch software system doesn't have to be. Whether you are a freight broker or carrier, truckload or LTL, our 3sixty Operations Management software is a single entry system that fully integrates operations and accounting. Our dispatch software is feature-rich and built to facilitate the access and movement of critical data between your industry software applications. The result? Improved efficiency and profitability.

Compliance Services

Enjoy the peace of mind that comes from knowing your fleet and drivers are in compliance with all State and Provincial regulations. Our Compliance Services remove the worry, headache and expense involved in managing the increasingly complex and time-consuming world of fuel tax reporting, driver/equipment compliance and the new U.S. Customs and Border Protection Regulations – Automated Commercial Environment (ACE).

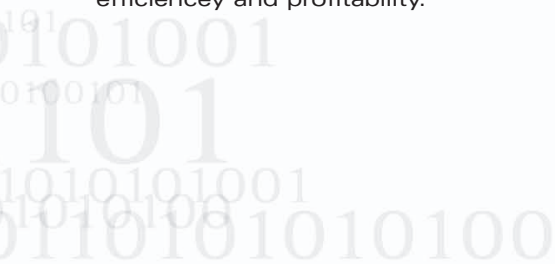

Financial Services

Strong financial management is the lifeblood of any company. Our collection of products and partners provide much needed financial efficiency to any transportation organization. Our fuel management solutions give you secure, full-control over company purchases. Load payment guarantee, invoice management services as well as receivable factoring are available through our partnership with an international financial services provider.

Rail-Intermodal

Tracking billions of dollars of equipment and cargo is crucial for good customer service and efficient rail/intermodal operations. Our wireless technology products electronically identify and monitor rail and intermodal equipment - enabling you to track and monitor assets more effectively, increasing equipment use and reducing re-handles, dwell time, and overhead. Improve your rail and intermodal operations with the proven reliability and cost effectiveness of 3sixty Rail/Intermodal Services.
