

## Rail Repair System – Keep Assets Producing.

3sixty Rail-Intermodal's Rail Repair System automates rail repair shop operations from inspection to invoice. It tracks car status throughout the repair process, allowing the user to view the projected release and status versus POD by car.

By incorporating AAR, NITL codes, assigns materials, and labor, you have the ability to compare standard estimated costs to actual. Estimated labor and material requirements are captured as part of the inspection process for use in managing and scheduling the repair shop. Visibility of line schedules ensures that your operations plan is as cost-effective as possible.

Run your business with reporting and operational functions that improve efficiency and management of the facilities, plus giving a corporate-wide view of what's going on within each operation. Services included in our Rail

Repair System include:

- AAR Pricing Interface
- Purchasing System
- Program & Quote Maintenance
- Inspection & BRC Creation
- Work Order Generation
- Material Functions (Bill of Materials, Inventory)
- Invoicing
- Car Status Tracking
- Scheduling
- Remote Access to Data via Portable PCs

## Materials Management ERP System – Efficiency of Inventory Assets

Improve efficiency and facilities management with Web-based reporting and operational functions designed to give you a corporate-wide view of activity within each facet of your operation. Through a customized mixture of electronic data-feeds and handheld technology, you achieve total inventory visibility across many transload and warehouse facilities. By knowing your exact inventory and its location, you can drive efficient storage, processing, and shipping of your materials.

Our system provides an intuitive graphical interface with multi-site, multi-mode functionality to enable inventory tracking on a real-time basis. A command and control module performs reporting and aggregate billing functions across an unlimited number of facilities.

Key features include:

- Shipment planning and execution
- Transaction rating and invoicing
- Comprehensive customized inventory, customer, and management reports
- EDI transactions – receive and send
- Capture all miscellaneous charges to book other billable activities within your facility
- Electronic storage and printing of Work Orders, Bills of Lading and Customs Data
- Customer visibility access (optional)
- Basic inbound tracking and receiving

**The tools to drive your business.** The 3sixty Rail-Intermodal infrastructure and service provider suite provides unparalleled visibility into your distribution chain and operations. Designed to meet the specific needs of infrastructure and service providers, our Web-based management and reporting tools will help you maximize shipment visibility, reduce operating costs, and improve your efficiency.

With powerful products to capture high quality data and a suite of software and professional services to analyze it, our comprehensive operations

## Solutions for Infrastructure and Service Providers.

system for your rail yard(s) and terminals, repair shops, and transload facilities provides maximum visibility. You can manage your operations more efficiently and lower costs with our Web-based operations management and reporting tools.

### Track, Trace, and Intervention Services – Unprecedented Visibility.

The shortest distance between two points is a straight line, but your shipments often take an indirect path. With track, trace, and intervention services from 3sixty Rail-Intermodal, you have unprecedented visibility of your shipments no matter how – rail, intermodal, container, or truck – your shipment moves.

**Multi-Modal Tracking Systems.** Automated, accurate data collection and delivery are the foundations of our Web-based multi-modal tracking system that allows you to proactively manage your shipments from origin to destination and all points in between. Knowing where your shipments are, and more importantly, when they are getting to their destination, gives you the power to make better, faster business decisions, improving the bottom line and customer service. Features include:

- Up-front exception management
- Detailed search mechanisms with query-saving capability
- Consistently updated original and dynamic ETAs
- Pipeline reporting for loads and empties
- Easy-to-use alerting and ad-hoc reporting mechanism

**Data Cleansing Services.** Because not all data can be provided automatically, data cleansing and completion services are vital. 3sixty Rail Intermodal services include:

- Duplicate events elimination
- Manual missing events addition
- Proper termination events for accurate:
  - Reporting of on-time delivery metrics
  - Calculation of applicable detention and demurrage charges
  - Carrier scorecard generation
  - Asset utilization analysis

**Intervention Services.** 3sixty Rail-Intermodal can also provide intervention on shipments in exception status, including delayed, bad ordered, and out-of-route shipments.

3sixty Rail-Intermodal track, trace, and intervention services help you to reduce distribution chain inventory, improve asset utilization, select the optimal transportation mode, and lower operational costs. Additionally, you can proactively communicate with your customers armed with the knowledge that you need to keep them informed.

### Yard Management – Gain Control over Operations.

Our Web-based rail yard and terminal management system allows you to control the critical operations of your yard(s). Available on a turnkey basis, you can improve operational efficiency and manage vehicles within a terminal with improved accuracy and timeliness of your data. You can easily monitor vehicle location, view mechanical specifications and equipment status, conduct inspections, and create switch lists.

Additional benefits of our yard management solution include:

- Reduced manual labor for obtaining status and location information
- Reduced switching costs by knowing car status & location real-time
- Increased insight into demurrage and detention for proactive yard management
- Centralized access to yard data, including location, mechanical, maintenance, and BOL
- Reduced costs and enhanced system efficiencies with RFID reader integration

Our 3sixty Rail-Intermodal yard management solution features:

- Pictorial representation of car types, color coded for status
- Detention and inspection handling
- Repair and maintenance components
- Extensive reporting and querying tools
- Fixed readers, as well as hand-held readers
- Integrated BOL generator (optional)
