

FORTÉ™ HOST SYSTEM

Designed with today's latest Web- and object-oriented technologies, Forté Host System provides the support you need to operate any electronic toll collection system or other account-based revenue collection systems. Forté Host System can easily integrate your entire system to provide comprehensive support for toll collection deposits, fare and fare schedule definition, traffic and revenue statistical reporting, and general financial management and audit reports. The Forté Host System is flexible enough to support both single and multiple tier system architecture design.

FEATURES	BENEFITS
Widely accessible Web-integrated product	Provides common interface and centralized data for comprehensive, integrated systems
Field-proven, user-friendly software	Allows efficient performance of host functions with minimum personnel
Seamless interfaces to Forté Account Management, Forté Violation Management, Forté Lane System, and Forté Maintenance Management	Provides true turnkey system
Operational and audit reports	Provides comprehensive traffic and revenue data
Expanded, comprehensive reporting	Provides critical operational information
Enhanced financial management features	Provides critical financial information to maximize revenue
Downloads content to spreadsheet	Provides quick and simple management of information with maximum flexibility for your ad-hoc data analysis needs
Supervisory functions	Allows real-time monitoring of transaction data and remote control of lane operations

Forté Host System is part of the integrated suite of components that comprise TransCore's Forté Toll Solutions. For more information on any part of our system, contact us at: 800.923.4824 or 972.387.8197
