

FORTÉ™ MAINTENANCE MANAGEMENT

Forté Maintenance Management is an integrated call dispatching, work order management, preventive maintenance, and inventory control system designed to support the maintenance of toll and other electronic systems. This product provides a comprehensive, yet flexible system of reporting, tracking, managing, and updating maintenance issues in lane and plaza equipment. As either a stand-alone component or integrated part of Forté Toll Solutions, Forté Maintenance Management allows you to maximize uptime and minimize the life cycle costs of your operations.

FEATURES	BENEFITS
Widely accessible Web-integrated product	Provides centralized data and common interface for comprehensive, integrated systems
Preventive and predictive maintenance scheduling	Replace equipment and implement procedural changes before parts break and impact operations
Corrective maintenance scheduling	Dispatches calls based on level of priority
Work order management and reporting	Automatically creates, processes, and tracks work orders as well as response and repair times
Equipment inventory management	Ensures availability of parts; greater cost control
Equipment status reporting	Tracks location and installation time of parts, automatically determines if parts are under manufacturer's warranty
Maintenance reporting	Details equipment failures across all plazas and computes lane/system availability

Forté Maintenance Management is part of the integrated suite of components that comprise TransCore's Forté Toll Solutions. For more information on any part of our system, contact us at: 800.923.4824 or 972.387.8197
