Safe and Secure Parking for your Employees, Guests and Vendors

Every day, a variety of vehicles enter your parking facility. So, employee access and security is critical. TransCore’s automatic vehicle identification (AVI) technology, based on radio frequency identification (RFID), provides the ability to create dedicated employee parking areas restricted from guests and delivery vehicles. Your employees can enter and exit more efficiently, and non-staff traffic can be monitored to maintain safety and improve throughput.

Flexible and adaptable, TransCore’s systems can seamlessly integrate into your existing access control and facility management software and operations systems to create a total solution designed to meet your unique needs.

Green parking is just a step away
Carbon Calculator
See how you can lower emissions with TransCore’s greener parking and access control solutions.
